DETAILED ACTION

Drawings

1. The drawings were received on 1/20/06. The examiner approves these drawings.

Claim Rejections - 35 USC § 103

2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okado et al in view of Kotsugai et al and Parker. Applicants' arguments have been carefully considered but not persuasive. The term of exercising of a toner carrier and toner and the mixing of a toner and carrier as taught in the prior art are similar. Delaying the printing process does not have any time period to the pre-imaging blending cycle. Any movement of the toner and carrier would affect the magnetic attraction of the developer. Okado et al [0170] teaches the mixing of a carrier and toner. Parker also teaches the use of heat in the mixing of a toner and carrier. Kotsugai et al teaches the magnetic particles in a toner composition. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the known magnetic developers and the mixing of the toner carrier prior to the printing process to obtain the properties of the toner composition to improve the developer.
3. Claims 12-15 and 21-27 are allowable

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
